

ARE YOU A CANDIDATE FOR...

MINI DENTAL IMPLANTS

New York DMD

MINI DENTAL IMPLANTS have all of the advantages of conventional implants, but due to their size, they also have **many unique benefits**.

WHAT is a mini dental implant?

A Mini Dental Implant is a small **titanium alloy** that is placed in your jawbone.

It brings **stability** to your tooth or denture by acting as the root of the tooth.

WHO IS A CANDIDATE?

Experience the benefits of Mini Dental Implants - even if you may not qualify for conventional implants.

You are a **good candidate** for Mini Dental Implants if you:

Are interested in a **lower cost** option

wish to **avoid full surgery**

want **more stability** for your denture

have **significant bone loss**

HOW ARE MINI DENTAL IMPLANTS PLACED?

Quick and with minimal discomfort.

Mini Dental Implants **can be placed very quickly** in a single visit.

Your dentist uses **minimally invasive** technology with local anesthesia to place the implant in the jawbone.

No Scalpel, No graft, No Suture Procedure.

Less visits to the Dentist.

Short healing time allows denture, teeth, tooth to be inserted that same day!

WHY SHOULD YOU CHOOSE MINI DENTAL IMPLANTS?

Give your dentures long-term stability & a completely natural feel

No sedation is necessary

Minimally invasive procedure

Short healing time

A broader range of patients are candidates for this procedure

FACTS AND STATS

30,000,000+

More than 30 million Americans are **missing all their teeth** in one or both jaws. *

The **success rate** of mini dental implants has been reported in scientific literature as **94 percent**. *
